1. In view of the present and increasing difficulties in allocating frequencies to TACAN beacons in the NATO area, and to ensure the usefulness of TACAN until mid-1970's, the Standing Group requests that EMCCC investigate, as a matter of urgency, the possibility of implementing the ICAO policy for doubling the number of available TACAN channels, including the development of an implementation program, which is likely to be difficult.

2. Your findings should be reported to the Standing Group in due course.
